Countering Terror with Transitional Technologies

March 19-22, 2007

Disney's Coronado Springs Resort, Lake Buena Vista, FL

<http://www.gomactech.net>

Systems that can gather and analyze data as well as make decisions autonomously in harsh unfriendly environments require a marriage of high performance information processing technologies with highly capable sensor technologies. Such "Intelligent Technologies" are a key element for the successful development of future civilian and military systems. GOMACTech-07 addresses the technologies and infrastructure necessary to achieve this dramatic advance in functional capabilities and highlights the current state-of-the-art in intelligent systems.

GOMACTech is the premier forum for reporting on Government-funded microcircuit research and other research efforts that focus on the technology needs of Government systems. It is an unclassified export-controlled event. All registrants must provide proof of U.S. citizenship or permanent resident status and sign a non-disclosure statement prior to being permitted entry into the conference.

As in the past, GOMACTech-07 will feature Government Applications and Vision Sessions, and selected Research and Development Program Reviews. These sessions offer the attendee insight into Government views of critical technical challenges, and provide an opportunity for key Government organizations to announce major technology and system initiatives.

Exhibit space will be rented at \$2100 for each 8 ft. deep by 10 ft. wide booth

Every effort is being made to assure attendees' participation in the Exhibition. An afternoon break on Tuesday and morning and afternoon breaks on Wednesday will be held in an area inside the Exhibit Hall. Technical sessions will be held on Tuesday through Thursday from 8:30 am to 12:00 pm and from 2:00 pm to 5:00 pm.

Dear Potential GOMACTech Exhibitor:

The Government Microcircuit Applications & Critical Technology Conference (GOMACTech) has become the premier forum for the dissemination of information of Government-funded microcircuit research-and-development programs and provides the opportunity for presenting leading-edge research and development as it applies to today's challenges.

At this time, GOMACTech is soliciting Exhibitors for GOMACTech 2007, to be held at the Disney's Coronado Springs Resort in Lake Buena Vista, FL, on March 19-22, 2007.

Humankind has always been characterized by exploration. Early explorers moved in the world on a geographical scale, mapping the land and seas by hand. As technology advances, so does the precision of measurement, which expands our capability for exploration out to the reaches of the universe and into realm of the atom. GOMACTech-07 provides a forum for discussing and demonstrating recent breakthroughs in our capability for "Exploring Invisible Worlds." It is precisely these technologies that will take us into a new existence where our military and civilian systems can see what we cannot, and translate that vision into information critical to our understanding of the world around us.

Enclosed is the Exhibitor Information Package containing information on how to reserve exhibit space at GOMACTech-07. The Package consists of the following: (1) Guidelines and Application for Exhibit Space, (2) List of 2006 GOMACTech Exhibitors, and (3) Exhibition Floor Plan. All accepted applicants will be listed in the GOMACTech Advance Program as a GOMACTech 2007 Exhibitor.

This application, properly executed by the applicant, shall, upon written acceptance and notification of booth(s) assigned by the GOMACTech Executive Committee or its agent, constitute a valid and binding contract. Once exhibit space is confirmed, the exhibiting company's logo will be displayed on the GOMACTech 2007 Web site. The logo will be linked to the exhibiting company's site.
