

GOMACTech 2007 Technical Session Proposal and Information Form

Session Title:	Trusted Foundry (TF) - - Status and Plans
Session Abstract (250 words):	The Trusted Foundry was created by DoD & NSA to lead to two things: 1) Low volume access to state of the art integrated circuit technology; and 2) Trusted commercial suppliers of IC parts for NSA and DoD systems. This session will describe results to date in both these areas.
Session Champion:	Sonny Maynard
Phone:	703-697-8714
Email:	Sonny.maynard@osd.mil
Session Organizer:	Gerry Etzold
Phone:	443-479-8138
Email:	gwetzol@nsa.gov
Session Chair:	Ray Price
Phone:	301-688-
Email:	raprice@nsa.gov
Session Co-Chair:	Chuck Caposell
Phone:	301-904-3502
Email:	

	Invited Paper Title	Author	Affiliation
1	Aggregating DoD and NSA's purchases of IC parts. How DoD can move closer to the state of the art ?	Gerry Etzol	National Security Agency
2	DoD the Foundry Customer—Overview and assessment of how DoD has used a commercial foundry.	Foundry Services VP of Microelectronics	International Business Machines
3	Training DoD Designers to be efficient users of a commercial foundry .	Dan Radack	DARPA
4	Accrediting New Trusted Suppliers and Providing trusted parts to the end of system life.	Ted Glum	DMEA
