The Government Microcircuit Applications & Critical Technology Conference (GOMACTech) has become the premier forum for the dissemination of information of Government-funded microcircuit research-and-development programs and provides the opportunity for presenting leading-edge research and development as it applies to today's challenges.

At this time, GOMACTech is soliciting Exhibitors for GOMACTech 2008, to be held at The Riviera Hotel, Las Vegas, NV, on March 17-20, 2008.

The proliferation of cognitive emerging nanometer scale integrated electronics embedded in government and civilian systems will create a world in which information access is ubiquitous and available on demand at anytime and from anyplace. The capability to communicate seamlessly throughout the world requires complex wired and wireless networks that utilize nano and micro-scale transducers that sense and interact with the physical environment. Development of secure, robust, intelligent sensor networks that deliver information instantaneously between urban and rural areas is also a necessary element for defending our homeland and protecting our national interests. Critical research in nano-circuit technologies is the prime driver for integrating and deploying cognitive sensors into miniature and large electronic systems for military, homeland defense, space systems, and medical applications. GOMACTech-08 highlights emerging highly innovative technologies that provide a bridge from the world today to the world tomorrow where information is available on demand everywhere.

Enclosed is the Exhibitor Information Package containing information on how to reserve exhibit space at GOMACTech-08. The Package consists of the following: (1) Guidelines and Application for Exhibit Space, (2) List of 2007 GOMACTech Exhibitors, and (3) Exhibition Floor Plan. All accepted applicants will be listed in the GOMACTech Advance Program as a GOMACTech 2008 Exhibitor.
