

Dr. Donna Joyce, a member of the Senior Executive Service, was appointed as the Army Senior Research Scientist (ST) for Protective Technologies in December 2019. She serves at the U.S. Army Combat Capabilities Development Command Aviation & Missile Center, Software, Simulation, Systems Engineering and Integration Directorate (DEVCOM AvMC, S3I), Redstone Arsenal, AL. As the Army's Senior Technologist for protective technologies, she provides scientific expertise and technical guidance in the research, development, and transition of protective technologies to include Anti-tamper, Hardware Assurance, Microelectronics Security, and Advanced Packaging. Dr. Joyce collaborates with a broad Science and Technology community of subject matter experts across government, industry, and academia to provide cost effective solutions for the Army and DoD weapons systems. Outside of work Donna enjoys weekly hiking in the Land Trust of North Alabama with her husband Paul, visiting with her 3 kids and 3 grandkids, and planning adventure trips with her family.

Vision Statement: Sustainment of the Expertise of the Army Protective Technologies Lab to provide cutting edge security solutions to the Warfighter.
