

Dr. Gawron-Hyla is on detail as the Microelectronics Commons Technical Execution Area Lead for Workforce Development supporting OUSD (R&E). Her role includes oversight of Hub workforce development portfolios as well as coordination of microelectronics workforce development efforts between the Commons and other government agencies. Prior to her detail, she served as a Materials Chemist in the Electromagnetic Spectrum Sciences Division of DEVCOM Army Research Laboratory where she supported research efforts in electronic device protection and secure packaging as part of the Protective Technologies Team.

She holds a B.S. from Rose-Hulman Institute of Technology, M.S from Purdue University, and a Ph.D. from Georgia Tech. She also taught high school for 10 years prior to her Ph.D. work
