

Dr. James Adleman is an Electronics Engineer in the Advanced Photonic Technology Branch, Communications and Networks Department, of Naval Information Warfare Center Pacific (NIWC). He completed his Ph.D. in Electrical Engineering from Caltech in 2009. Since 2009 he has conducted research in microwave and integrated photonics for Naval applications, focused on wideband signal remoting and high dynamic range analog signal processing for communications and electronic support. Dr. Adleman also supports DARPA MTO as a contract officer's representative and SME for photonics programs.
