

Travis J. Anderson is a Professor in the Department of Chemical Engineering at the University of Florida. Prior to joining UF in 2024, Dr. Anderson was the Head of the Power Electronics and Advanced Materials Branch at the U.S. Naval Research Laboratory in Washington, DC, leading a group of scientists studying fundamental material growth, device processing, and performance evaluation of power electronic materials such as SiC, GaN, Ga₂O₃, and diamond. His research career has focused on wide bandgap III-N devices and process integration. He has expertise in fabrication, reliability, thermal management, and radiation effects in GaN, AlGaN, and many other materials systems. Dr. Anderson received a PhD in Chemical Engineering from the University of Florida in 2008, and a BS in Chemical Engineering from the Georgia Institute of Technology in 2004.
