

Dr. Benjamin B. Yang (Ph.D. E.E., University of Wisconsin-Madison M.S.E.E., M.B.A.) is a microelectronics and photonics researcher at the Georgia Tech Research Institute (GTRI) where he also serves as the associate division chief for the Hardware Security and Trust Division. Prior to GTRI, Dr. Yang was a senior member of the technical staff at Sandia National Laboratories. Dr. Yang has broad research experience in electromagnetics and device physics, working in a number of disciplines that include photonics, semiconductor device failure analysis, photovoltaic system reliability, and terahertz spectroscopy culminating in 40+ peer-reviewed publications and 1 patent.
