

Wes Hansford is a Microelectronics R&D Principal Investigator for SSED. Prior to joining Boeing, he worked for IMEC (USA) as a Senior Strategic Partnerships Manager, and for USC/ISI as Director of the MOSIS integrated circuit fabrication brokerage. He earned his MS in electrical engineering at the University of Southern California, and worked for semiconductor firms National Semiconductor and Texas Instruments before joining MOSIS. Wes has focused his career on microelectronics development, both for commercial and (especially) government applications. He has over 25 years of leadership experience, with engineering teams, then overall program and business management.
