

Patrick Shea is a program manager in the Advanced Microsystems team at Northrop Grumman Mission Systems, responsible for component development for RF, EOIR, and Photonics technologies. Dr. Shea received his PhD from the University of Michigan in 2006, and has been with Northrop Grumman Mission Systems since 2007 with roles focusing on device and integrated circuit development in rad-hard electronics, EEPROMs, Si CMOS, SiGe HBTs, and nitride-based switches and amplifiers. Dr. Shea was manager of Emerging Technologies at Northrop's Advanced Technology Laboratories from 2018-2022.
