

Government Microcircuit Applications & Critical Technology Conference GOMACTech Poster Guidelines 2025

The GOMACTech-2025 Poster Session will be held on Thursday, March 22, from 10:30 AM to 12:00 PM PT at the Pasadena Convention Center in Pasadena, CA. The room will be open for poster setup beginning at 8:00 AM on Thursday: a 4-foot high x 8-foot wide bulletin board with ample tacks and 3 feet x 18 inches of table space for handouts/demonstrations will be available.

The poster session is intended to provide presentations that are judged to be best suited for this interactive format. The success of a poster session is attributed not only to the high quality of the papers but also to the authors' adherences to the following guidelines for effective presentation in poster format.

The key guideline is that the poster should not consist of a copy of the manuscript. It should allow the attendees to recognize the key points of the work easily from a distance of at least 10 feet to facilitate more detailed discussions with the author(s). Often the best poster comprises a few large graphs/illustrations annotated clearly to show the viewer why each is significant with only enough text to headline key points like purpose, conclusions, and impact.

Specific Guidelines

- Authors are responsible for the printing, shipping, set up, and teardown of their posters.
- Authors are expected to be present for the duration of the session to answer questions.
- An area 12 inches high and 9 inches wide in the top left corner of the poster board will be used by GOMACTech for poster identification.
- The poster will typically consist of large paper format (4 feet x 3 feet) covering the provided area.
 - Templates and guidance are provided on the GOMACTech website.
- Please include the paper title and authors.
- Please include a brief abstract outlining the key points of the paper.
- Use a minimum font size of 18 points for text and 30 points for headings.
- Appropriate use of color is encouraged.
